

ABSTRACT OF THE INVENTION

[0075] An Electronic Vehicle Monitoring System and ~~Related~~ related method for tracking ~~the location of the location of motor vehicles, is disclosed which tracks the~~ location of a plurality of motor vehicles at a particular location, to ascertain the exact position at which any motor vehicle is parked. The system of the present invention also automatically determines when each motor vehicle at a location enters or leaves the location or a particular area, and can ~~The system of the present invention~~ also automatically determine which of a plurality of motor vehicles experiences ~~having~~ a security violation. ~~In addition~~ Additionally, the system immobilizes the vehicle if ~~tamper~~ tampering to the vehicle mounted Transceiver, CPU or GPS system is detected, and reported ~~said violation~~ to a monitoring station. The system also utilizes an Electronic Key Track.
